Darlene Staffeldt, State Librarian

This report contains statistical information for all 79 legally established public libraries in Montana. All statistics are reported by the libraries themselves, except for the population, which is pulled from census statistics. The State Library cooperates with the Federal-State Cooperative System (FSCS) program, which develops and compiles national public library statistics for the United States. MSL provides Montana information to the FSCS so that policy-makers, funders, trustees, and librarians can identify trends in the country's libraries services.

I hope that Montana public librarians, trustees, and friends find this report of use to improve the quality and effectiveness of public library service. This information can be useful both in evaluating past efforts and in many planning activities. One way to evaluate your library's performance is to compare measures from year to year. Another way to evaluate is to compare your library's performance with other similar libraries.

The context of the statistics is important for both types of use. If your library's circulation has decreased significantly from year to year, you might easily find the answer if you have experienced budget reductions. However, you may not find an easy answer and you must investigate these changes to remedy problems or continue beneficial activities. Such analysis should use statistics from as many years as possible to spot long-term trends.

If you use the measures to compare your library to other libraries, you should use similar libraries so that the comparisons are meaningful. This report is designed to help you do so by dividing libraries into groups that serve similar populations. However, even within these population groups, wide variations exist between individual libraries. Before using the statistics to make comparisons, check that similarities exist in other factors, such as income, hours open, collections, or mission, goals, and objectives.

The information in the report is presented in two main sections -- performance measures, and general tables. In the first section, MSL chose six measures to highlight. This section provides summaries, general descriptions, and identifies factors that may affect these measures.

The information in the second section, general tables, is presented in two ways. The first is by county name and then by city. The same information is provided by grouping libraries by population, allowing for easy comparisons of similar libraries.

We wish you well in your efforts to continually improve library services in Montana. If we can provide assistance, please do not hesitate to contact us.

Sincerely,

A handwritten signature in black ink that reads "Darlene Staffeldt".

Darlene Staffeldt  
Montana State Librarian

# Statewide Library Performance Indicators

---

## Core Performance Measures

Because of their potential applications to library services planning and because of their usefulness as general indicators of library service on a statewide basis, six measures have been designated as core performance measures:

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> Visits per capita       | <input checked="" type="checkbox"/> Turnover rate          |
| <input checked="" type="checkbox"/> Expenditures per capita | <input checked="" type="checkbox"/> Circulation per capita |
| <input checked="" type="checkbox"/> Holdings per capita     | <input checked="" type="checkbox"/> Income per capita      |

## General and Service Area Population Tables

The following pages provide summary data for these performance measures on a statewide basis. The population of the library service area is also provided. For each measure, the text gives a general description and identifies some of the factors affecting the measure.

In this publication, the general tables are categorized by the county in which the public library resides and report basic library information on a library-by-library basis.

## Interpreting Measures

Although community and individual library circumstances vary, the core measures and general tables can assist Montana's public librarians and trustees as they evaluate library activities and plan improvements in library services. We offer the following suggestions:

- Analyze the library's statistics in terms of library mission, goals, and objectives. Libraries, even in communities of similar size, have varying funding patterns and community expectations for service. A reference and resource library will show a different pattern of statistics than a popular materials library.
- Realize that online databases and the Internet have changed library use patterns. Although statewide and national data have not yet been collected on this service, individual libraries should be tracking this use.
- Remember that performance measure scores are not absolutes. Performance measures are not necessarily precise. Most measures are calculated in percentages and ratios. Do not be too concerned about "decimal points."
- Use performance measures in context. There are not "right" or "wrong" scores for performance measures. One performance measure alone cannot tell a complete story. Performance measure scores should be interpreted in context with each other and with the library's overall service program and budget.
- Exercise patience in working toward improving performance measure scores. Changing a library's score on a performance measure is usually not accomplished overnight. Such a change usually requires work over an extended period. Improving a library's score on selected performance measures has to be a cooperative effort among the library director, library trustees, and the local community.

# Visits Per Capita - SFY 2005

Visits Per Capita relates the number of people visiting the library to the population served. It can be thought of as representing the average number of times during a year that a member of the community uses the library. Visits Per Capita is calculated by dividing the library total attendance by the service area population.

## ***Factors that Influence the Measure***

- Fluctuation in the size of the service area population
- Library hours of service
- Physical arrangement and convenience of library facilities
- Community awareness of library service
- Special programs--prizes, reading programs, etc.
- Library circulation or acquisitions policies, loan period, fines
- Age, condition, and size of the library's collection

## ***Interpretation and Use***

Visits Per Capita is one measure of the community's use of the library, whether for materials, programs, or meetings. A high score on the measure indicates heavy use of the facility. A low score may indicate several things. For example:

1. The hours the library is open does not fit the needs of the community;
2. The library's collection and/or programming does not meet the community's interests or needs;
3. Residents may be unaware of what the library has to offer;
4. The facility may be uninviting.

# Circulation Per Capita - SFY 2005

Circulation Per Capita relates the number of items a library circulates to the population served. It can be thought of as representing the average number of items checked out in a year by a member of the community. Circulation Per Capita is calculated by dividing the library's total annual circulation by the service area population.

## ***Factors that Influence the Measure***

- Fluctuation in the size of the service area population
- Increase or decrease in the number of items circulated annually
- Library circulation or acquisitions policies, loan period, fines
- Special programs--prizes, reading programs, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

## ***Interpretation and Use***

Circulation Per Capita is another measure of the community's use of the library. A high score on this measure indicates heavy use of the library's circulating materials. A low score may indicate several things. For example:

1. The library's collection may not meet community needs or interests;
2. Community residents may be unaware of the library's resources;
3. The library may have an extensive collection of non-circulating materials.

# Collection Turnover Rate - SFY 2005

Turnover Rate measures the activity of a library's collection, indicating the number of times each unit of library material would have circulated during the year if circulation had been spread evenly throughout the collection. It is calculated by dividing the library's total annual circulation by total library holdings.

## ***Factors that Influence the Measure***

- Increase or decrease in the annual circulation
- Circulation policies--loan period, fines
- Library acquisitions and collection development policies
- Special programs--prizes, reading program, etc.
- Community awareness of library service
- Library hours of service
- Number of library users
- Age, condition, and size of the library's collection
- Physical arrangement and convenience of library facilities

## ***Interpretation and Use***

This measure related strongly to the goals each library has set for meeting the service needs of its community. A library which emphasizes the circulation of popular reading materials will have a higher Turnover Rate than a library which emphasizes subject depth in its collection and has an extensive reference collection.

# Income Per Capita - SFY 2005

Income Per Capita relates library income to the population of the service area served. It is obtained by dividing the library's total income by the service area population. Figures shown here are based on each library's **total income**, which includes city, district, county, state, federal, and other income.

## **Factors that Influence the Measure**

- Overall local economic conditions
- Changing tax base
- Demands on local government for all public services in general and library service specifically
- Community perception of the importance and value of library service
- Political climate
- Changes in the availability of state and federal grants

## **Interpretation and Use**

Knowing the extent to which a city, district or county government is providing the financial support possible for its library is valuable information for public librarians and their boards.

	Parmly Billings Library	43,939	35.69%		
<b>Totals:</b>		<b>440,650</b>	<b>48.62%</b>	<b>30</b>	<b>0</b>

NA = Data not available because the library has not purged its files in the last three years.

Percent Registered may be greater than 100% because some libraries allow people not in their service area to register.
